yes, please, S/f and OPA cooperate in assisting HQ. we need to be very firm about inaccurate statements.

i spent a full day in STL y/day and no one mentioned Westlake.

Cecilia,

This is the e-mail I was referring to in our meeting this morning. Could your folks draft a proposed response we could send to hq for Mathy to use in responding?

Some factual inaccuracies need to be corrected, and we could provide some factual context. We would be happy to work on wordsmithing.

Thanks,

Rich Hood

Happy Friday-- I wanted to alert you to the Westlake email campaign to AA stanislaus. You will recall Mathy gave out this address at the St. Louis Environmental Roundtable last March and he is planning a visit to KS in February. Can you alert the program office in the Region and assist in drafting a response to the emails--thanks!!!!

Marsha

Hi Shawna,

AASanislaus received 105 emails with this same message as below starting Friday, February 18 up until today. I wanted to make you aware of this.

Thanks,
Rachel

I am appalled to learn of the community harm and growing dangers coming from nuclear waste housed at the Westlake Landfill. This community of working families has been robbed of their safety and health by the smells from this landfill and faces an urgent and growing threat from an underground fire approaching the nuclear waste.

The Environmental Protection Agency needs to take immediate action on the Westlake Landfill. The EPA should select an inspector, with public input, to assess the dangers of the underground fire and recommend measures to secure the site. The site's owners Republic Services, not taxpayers, should be required to pay for this long overdue measure.

Dealing with the fire only addresses one urgent danger and the EPA should begin steps towards removing the nuclear waste from Westlake.
